SERVICES DIVISION INDICATIONS JOURNAL

8 April 1955

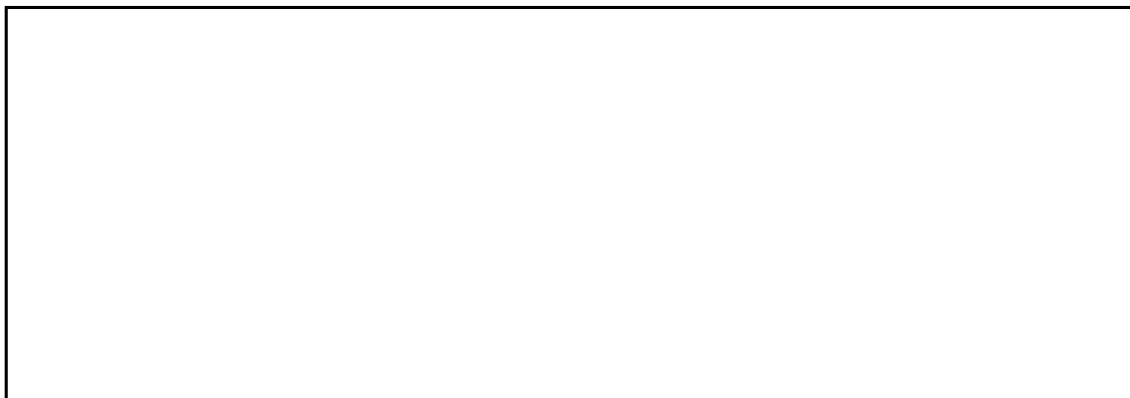

1. North Korea - Military - Heavy Ordnance
(Info Date - 3 Apr 55)

According to a North Korean broadcast from Pyongyang on 3 April, the Chinese units now withdrawing from Korea are also shipping ordnance materials out of Korea. The broadcast reported that 122 mm howitzers, antitank guns, antiaircraft guns, mortars, rocket launchers and field pieces were being shipped. It was stated that the first outgoing train on 3 April was fully loaded with antiaircraft guns.

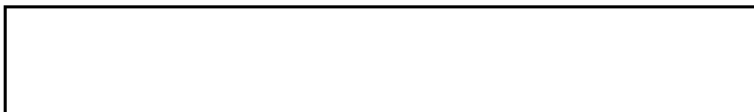

S/TR Comment: It is probable that the ordnance being withdrawn from Korea represents equipment organic to the military units being withdrawn. If the Chinese foresaw a resumption of hostilities in Korea it would seem likely that this material would have been stockpiled there. It is known, however, that the North Koreans have received military equipment from China, despite the terms of the Korean cease-fire agreement.

3. Formosa Straits - Military - Air
(Info Date - Mar and Apr 55)

25X1

S/COM Comment: According to aerial photographs taken on 4 and 5 April, Lu Chiao airfield is operational, with jet fighters already engaging in patrol activities. It is believed that the Li Shiu mentioned above is a garble, and probably refers to Li Shui. Li Shui is located approximately 100 miles west of Hai-men and approximately 75 miles ESE of Ch'u-hsien.
